## Statement of Purpose

Following an assessment of the profile of a graduate of Simmons College, I am convinced that the college will be ~~an ideal institution for me to pursue the Doctor of Nursing Practice (DNP) program. Simmons College seems to instill leadership skills as well as dwell on a strong focus on professional practice to its students (Coch, de Vries, & Hunsley, 2011). The three main reasons why I selected Simmons College to pursue my DNP include; the college offers a track for obtaining an MPH, FNP to the DNP degree; the second reason is that the college offers its nursing program online and through external clinical support which allows for easier management of time as regards attending to work and at the same time focusing on the studies; and thirdly the college has first-time successful pass-rate that is higher than that of other programs.~~

My educational and professional goal is to start a business which will offer healthcare services with the main focus being preventive healthcare ~~in underserved areas. The second goal is to obtain ability to teach the masses in the future on how to use various internet resources. DNP program is specifically designed for the experiential and advanced practice nurses and as a result it will perfectly suit me since for numerous years I have practiced the nursing profession and engaged in various projects. For instance, having 19 years in online clinical trials as NCSA~~

~~In Florida and a vast experience in industrial clinical environments while also offering leadership~~  
~~experiences and treatment for industrial clients as well for family practice, program as well for~~  
~~a DNP program. The program essentially aims at developing nursing leaders who may enhance~~  
~~leadership outcomes in the clinical practice~~ (Upenieks, 2003). For this reason, it will help me  
attain the goal of running my own healthcare business as well as impacting knowledge to  
upcoming nurses through mentoring and coaching.

Since graduation, I have worked as Clinical Research Associate and Consultant for the  
study trials for pharmaceutical industry from ~~1998 to 2015 and had over 20 years in clinical roles~~  
~~and with experience. I have gained various leadership lessons through my nursing professional~~  
~~practice while also learning to work with people of diverse backgrounds within a team context.~~  
~~Working with teams has given me opportunity to obtain effective listening skills as well as being~~  
~~communicative to other people's ideas. This~~ has allowed me to attain greater results when  
working with others and I look forward to improving the trait as I take the DNP program.

I envision the DNP program gaining more popularity in future because the changing  
demands in the healthcare environment ~~requires the highest degree of scientific knowledge as~~  
~~well as practice expertise (Mason, 2014). DNP program is designed to ensure the nurses gain~~  
~~the knowledge and leadership skills to enhance the delivery of healthcare services. As such, more~~

~~women will continue to enroll for this program in future as they aim to develop ways of~~  
~~improving their relationships with their patients and staff. The patients have varying needs and~~  
~~leadership skills are required to ensure there is good delivery of services (Chambers, Thompson,~~  
~~Gray, McCooling, Mialls, & Holmes 2015). Further, the leadership skills will also be sought by~~  
~~women as they look for ways to network with their~~ colleagues globally which is important since  
globalization helps businesses benchmark and learn from each other on the best practices  
(Sammarco, 2008).

If given the opportunity to be admitted at Simmons Colleges, I would bring ~~with me~~  
~~interpersonal skills, passion for learning, vast experience in nursing profession, as well~~ as ability  
to handle challenging work. I look forward to being a valuable addition to the institution.
